Subject : Statement by Dr. Aulis Hyvarinen in Opposition to Finnish  
Tobacco Act Amendments to Ban Public and Workplace Smoking

Please find attached a copy of Dr. Hyvarinen's final statement addressing the ETS science relied upon by the government to justify the ban on public and workplace smoking in the proposed Tobacco Act Amendments.

Obviously, we need to translate the document into Finnish. Also, we need to decide how best to bring Dr. Hyvarinen's independent, critical evaluation of the ETS studies to the attention of the appropriate government officials. Dr. Hyvarinen would be amenable to submitting his statement at our request or the request of other interested parties.

Perhaps we can discuss the matter further after you have had a chance to review the statement.

Best regards.

Tony Andrade
